**german
innovation hub**

together, we do more.

We are visiting BLOCK71

Meet us
26.06.2019 @Timbre

You are a young startup working on a competitive solution and who is hungry for customer data?

You want to connect with a brighter network to profit from experiences of mentors, experts and managers?

You want to get access to clients of the corporate partners and enter a new market?

Our vision

We are building the innovation-bridge between ASEAN and Germany. Therefore we initiate collaborations between Asian startups and established German corporates in order to innovate and co-create together.

About us

The German Innovation Hub is part of the ASEAN ecosystem since 2017

We provide markets insights

Trend scouting for upcoming technologies is our daily business in order to evaluate how they will change existing capabilities

We build networks

We connect investors, corporates and startups to encourage exchange in an innovative ecosystem

We enhance businesses

Creating ideas and validating products is as normal as providing workspace and doing ideation workshops

What is in it for you?

- Getting access to the clients of the corporate partners or potential investors
- Providing support from experienced mentors and managers
- Validating prototypes and solutions with a paid corporate project

Inspiring.

Fostering.

Growing.
